

ONLINE ELECTROLYSIS COURSE

BECOMING AN ELECTROLOGIST IS NOW EASIER THAN EVER!

California Electrology Academy now offers online training to facilitate the learning process of students worldwide. Via an online user-friendly platform, students are able to complete their theoretical lessons from their own home and at their most convenient time.

INTUITIVE INTERFACE AND ONLINE EVALUATIONS

The platform of the Online Electrolysis Course gives access to all the required teaching materials in a highly visual way. Each chapter studied includes a manual in PDF format, a PowerPoint presentation, videos or conference clips when available, as well as a quiz-type evaluation. Quizzes are completed online and students receive their results immediately.

AND PRACTICE

Once the online theory is completed, the student is required to report to CEA in Corona, California in order to complete the practical portion of the course. Under the supervision of our experienced instructors, students will be able to put into practice all the knowledge acquired online and pass their final exam with flying colors.

CAPTIVATING CONTENT

THE HISTORY OF ELECTROEPILATION

Where does electrolysis come from? Who invented it and why?

THE SYSTEMS OF THE HUMAN BODY

What is the human body? Which systems have an effect on hair growth?

THE SKIN AND ITS APPENDAGES

What is the composition of the skin and especially the hair? Where are the cells responsible for hair growth?

ELECTROLYSIS

What is the principle of electrolysis and how can it eliminate the hairs permanently?

THERMOLYSIS

How thermolysis current works and what are its advantages?

THE BLEND CURRENTS

What are blend currents and when should we use them?

THE CONSULTATION

Examination of the skin and hair, contraindications, treatment planning, and recommendations.

THE EXECUTION OF ELECTROEPILATION

What are the stages of the treatment itself and how to ensure a good insertion?

THE POSITIONING

Depending on the region treated, how should the electrologist and the client position themselves to ensure comfort and results?

THE PROBES

What are the different types of probes? Why use insulated probes?

HYGIENE AND ASEPSIS

What are the hygiene and asepsis approved methods for safe and professional electrolysis treatment

CODE OF ETHICS

How to behave with the customer? What to do and what to avoid!

THE WORKSTATION

What equipment do I need to provide professional and safe electrolysis care?

MARKETING

Know how to market its services, it's essential!

STARTING A BUSINESS

Some tools to get started in beauty!

- Designed for practicing Electrologists looking to further their skill and education.
- 120 hours theory and 60 hours practical.
- Complete the program in as little as 6 weeks!

*Prospective students must check prior to enrolling if the hours acquired at CEA will satisfy the requirements of their state or country.

WHAT IS ELECTROLYSIS?

Electrolysis permanently eliminates the cells responsible for hair growth by inserting a small probe in the hair follicle (natural opening of the hair) and emitting an ultra-fast current. Thanks to today's technology, the treatment is very comfortable, fast and 100% effective for all types of clients.

BECOME A PERMANENT HAIR REMOVAL SPECIALIST

Still today, electrolysis is the only 100% guaranteed method of permanent hair removal for all skin colors and hair types. Starting your career within this domain will allow you to meet the public's ever growing demand for a permanent method of hair removal. After having completed this comprehensive course, you will be able to master the most advanced permanent hair removal techniques in the world. With the incorporation of our international expertise, our state-of-the-art equipment and ultramodern facilities, you are sure to become an exceptional electrologist.
